Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Response to Arguments

In view of the appeal brief filed on August 25, 2003, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The specification is objected to as failing to provide proper antecedent basis for claims 5 and 6. In claims 5 and 6, there is no antecedent basis for “the lateral portions of the front surface are flat surfaces,” and “the lateral portions of the front surface are curved surfaces,” respectively.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-6 and 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Murphy (3,819,180). Regarding claims 1-6, 9-11, and 12-13, Murphy discloses a putter head comprising: a straight or offset shaft 14 (Figs. 1 and 6), a single solid, trapezoidal, unitary body 10 with relatively small, flat impact face (Col. 2, lines 53-59), and deflected balanced wings 17 and 8 constitutes lateral portions (Figures 1-6). Regarding claims 5-6 and 13-14, it is inherent in view of Murphy that the deflected balanced wings will deflect a golf ball away from its intended target whether the wings have flat or curved surfaces.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3711

2. Claims 7-8 and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murphy '180 in view of Swash (D234,962) and Holliday et al. (5,769,737). Murphy does not disclose lateral portions with openings to receive a shaft and a rear portion of the putter head having a cavity. Swash '962 teaches lateral portions with openings to facilitate shaft attachment for both left-hander and right-hander (Figs. 2-3). Swash '962 also teaches rear portion having a cavity to reduce the overall weight of the putter head. Holliday '737 makes it clear that the large surface cavity 17 removes unnecessary weight from the club head 10 to reduce weight of the putter head. Thus, it would have been obvious in view of Swash and Holliday to one having ordinary skill in the art to provide a rear cavity as taught by Swash and/or Holliday in order to reduce the overall weight of the putter head.
